

Dear Chief Stewart Phillip,

Justin has been chosen by his classmates to represent our school in a provincial math competition. Justin will be competing with children from all across the province.

As Justin's teacher, I do have reservations about Justin participating in this competition. Although he is by far the most advanced math student in his class, he has been refusing to work along side his aid to prepare for the competition. Perhaps it would be a good idea for you, Justin's aid and myself to sit down and discuss our options so that Justin can participate in this event.

Please get back to me to let me know when it would be most convenient to schedule a meeting. All entries must be made by March 10th for the April competition, so we will need to plan prior to that date.

Regards,

Martin Gregg,
V.C.S.A Math Teacher
